

The screenshot shows the Jira software interface. The top navigation bar includes icons for Issues, Components, Jira, and a search bar. On the right, there are buttons for '+ Create', 'Upgrade', and user profile settings.

The left sidebar contains a navigation tree with sections like 'For you', 'Recent', 'Starred', 'Apps', 'Plans', 'Spaces', and various project and queue entries. A 'Recent' section is expanded, showing items such as 'Residential & Com...', 'Summary', 'Queues', 'Multi-space work', 'Reports', 'Knowledge Base', 'AI agents', 'Customers', 'Channels', 'Raise a request', 'Customer notifications...', and 'Add shortcut'. The 'AI agents' section is marked as 'NEW'.

The main workspace is titled 'All work' and displays a Kanban board for the 'Residential & Commercial Maintenance Small Business' space. The board has columns for 'Basic', 'JQL', 'Search work', 'Project' (set to 'Residential & Commercial ...'), 'Assignee', 'Type', 'Status', and 'Updated: Within the last 1 week'. Filter options include 'More filters' and 'Clear filters'. The board lists several items:

- RCMSB-1: 'Outside of house needs a new coat of paint'
- RCMSB-1: 'Similar requests'
- RCMSB-1: 'Confluence content'
- RCMSB-1: 'Activity'
- RCMSB-1: 'Add internal note / Reply to customer'

On the right side, there are panels for 'To Do', 'SLAs' (showing 'Jan 26 12:29 PM ⓘ'), and 'Details' (showing 'Assignee: Kim M', 'Reporter'). A bottom banner at the bottom of the workspace says 'Pro tip: press [M] to comment'.
